DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12 and 14-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Mackool (US 5,354,265).

Mackool teaches a continuous sleeve 18 as claimed, wherein the sleeve can be made out of rigid plastic or "other suitable material" (col. 5, lines 26-28).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mackool (US 5,354,265) in view of Hood et al (US 5,746,713).

Mackool teaches all the claimed subject matter except for the sleeve being made out of metal. Hood teaches a similar sleeve wherein it can be made out of either rigid plastic or metal (col. 3, lines 44-45). In view of Mackool's teaching that "other suitable

Art Unit: 3763

material" can be used for the sleeve, it would have been obvious to one of ordinary skill in the art to use metal as taught by Hood to make the device of Mackool, particularly since Hood teaches the interchangeability of metal with rigid plastic.

Remarks

Applicant should note that since the instant claims have been intentionally drawn toward the sleeve alone rather than toward the sleeve in combination with the probe, that none of the limitations about the sizing and fitment of the sleeve on the probe are functional recitations and therefore carry no patentable weight. Any sleeve could meet the size/fitment limitations as long as you put the right size probe inside it. But since the probe is not positively claimed, the spacing between the sleeve and probe in the prior art references is irrelevant.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 3763

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
